Unisto **Manta** - Electronic Seal

Electronic security seal with 100 event memory and infrared (IrDA) download.
The Unisto Manta is a cost-effective security solution that will enhance and simplify security procedures, indicating tampering and deterring collusion.
Generating a unique time- and date- stamped seal number each time the vehicle is closed, the Manta registers and records all sealing and opening events. By creating an audit trail the Manta can provide evidence in the event of a security breach.
Simple to fit and operate, the self-powered Manta seal is built to withstand all weather conditions and will provide years of trouble-free operation.

Features and Benefits

Generates a random 4 digit seal number

Illuminated LED display with good visibility in poor light conditions

100 event memory: Verification of seal number, time and date of sealing and opening, instant memory access to the built-in audit trail enabling easy analysis of security violations or on time delivery

Infrared downloading capability to any IrDA compatible device

Self-powered, durable, rugged design for permanent installation. Manta is tested to IP69K to withstand high pressure cleaning and typical operating conditions worldwide, to ensure long life.
(IP69K test specification supplied on request)

Easy to operate, minimum staff training required

500 mm plastic coated cable hasp as standard

Flash memory for future upgrades

Options

Remote Sensor version allows multiple access points to be sealed using a single Unisto Manta

How to use

ISO 9001:2008 certified
