

New Lasermet facility expansion. Boosting innovation and delivering the highest standards of laser safety products and services worldwide.

We are pleased to announce the completion of our new facilities at Lasermet's northern operations site. These new facilities have been specifically designed to meet the growing demand for our laser safety products, which are trusted and utilized by professionals worldwide.

Located in the esteemed M7 Haydock Industrial Estate, our new facilities encompass the original Lot #11 (6,000 sqm) and Lot #12 (5,000 sqm), providing us with space for the manufacturing of our high-quality products.

Furthermore, on September 18, 2023, we successfully acquired Lot #13, which boasts a spacious 8,000 sqm area dedicated to storage and advanced packaging capabilities, enabling efficient dispatch of our products to customers around the globe and accommodating our growing operations.

A standout feature of Lot #13 is our impressive 1,500 sqm showroom. Within this showcase space, we will proudly exhibit the latest technological advancements that Lasermet has to offer.

This showroom serves as a platform to demonstrate the exceptional performance and superior safety features of our products, allowing professionals to make informed decisions about their safety equipment.

Our new showroom not only adds a touch of grandeur to our facilities, but it also serves as an interactive platform for our

customers to explore and experience the most advanced laser safety technology available on the market.

At Lasermet, we are committed to providing our customers with cutting-edge technology that prioritizes their safety and enhances their efficiency. With our new facilities, we can continue to innovate and deliver the highest standard of laser safety products and services, ensuring the well-being and protection of professionals in the laser welding industry.
