

MEAN WELL XLG-320-V-A operating as 12 volt or 24 volt LED Driver now available from stock

This versatile IP67 rated LED Driver has the option of 12 volt or 24 volt output, by selecting 12 volt, output is up to 216 watts and at 24 volts, output is up to 312 watts.

The advantage of the **MEAN WELL XLG-320-V-A** is the 12 volt and 24 volt options meaning you only need to stock one driver. This provides a wide range of options for different LED applications and is particularly suitable for use with applications that require LED Drivers to operate in very harsh environments. The IP67 rated metal aluminium casing and potting make them suitable for outdoor environments that have high dust, damp and humidity.

Manufactured with wide input range of 100-305VAC, high efficiency up to 94.5% and working temperature range of -40 - +85C. 5 year warranty and surge protection of 6KV/4KV. Standard functions include protections for short circuit, over voltage, overload, and over temperature.

In addition, the MEAN WELL XLG-320-V-A has built-in active PFC function that complies with EN61000-3-2 harmonic and global certificates per UL/CUL/TUV/CB/CE/UKCA including UL8750, EN61347-1 and EN61347-2-13 lighting related regulations.
