

Stagecraft Visual Giant Tanqueray gin bottle

The brief

This 3 metre high Tanqueray bottle needed to be totally weatherproof as it was to spend all year on deck of the Tattershall Castle boat on the River Thames.

Project Details

Once again we are delighted with the product and the first class service from Spur Creative

Chris Hobbs-Rex – Director, Stagecraft Visual Communications Ltd

The Process

We sculpted the [giant](#) 3 metre high Tanqueray gin bottle [prop](#) in [polystyrene](#) and then added detail around the neck of the bottle with [sculpted](#) clay. After this, we tin foiled the bottle and sealed the clay and made a [mould](#). We cast in fibreglass and [painted](#) the bottle, then sprayed with a gloss polyurethane 2-pack lacquer to give the finished bottle a glass look, and to weatherproof and protect the colour from UV rays. We needed to make a wax seal so we 3-D printed this, painted it and fixed it to the finished bottle. Once all of this was complete we applied printed vinyl labels.

The Result

As we have worked with our client before, they knew what to expect and were delighted with the results.
