

Pintro Kebab Machine P160 & Starter Kit

Bundle list price **£1,708.38***

Offer price £1,530.88

The PINTRO P160 is a skewer machine for butchers or other businesses that make skewers on a smaller scale

One person can easily operate this appliance. If you marinate your meat before skewering or mounting, it is also possible to work with two persons, with one person filling the containers and the other operating the appliance.

The advantages are that both the skewer sticks and the appliance stay clean while skewering, and of course its production speed.
