

## **PCE launches new high-speed camera PCE-HSC 1660**

**PCE Instruments recently launched its new high-speed inspection camera PCE-HSC 1660 which is a tremendous asset for people dealing with industry and research.**

The robust high-speed camera PCE-HSC 1660 can take up to 2420 pictures per second. For data evaluation using the software, it can be connected to a PC or laptop via the included USB 3.0 cable. The camera's CMOS image sensor has a memory depth of 10 bits and can thus capture high-speed black and white images at a resolution of 1280 x 1024.

The slow motion camera PCE-HSC 1660 comes with an LED light, a USB 3.0 cable, a remote trigger mechanism, a carrying case, a PC software, 2 mini tripods and a user manual.

PCE Instruments, with headquarters in Germany and offices around the world, such as the UK and the US, manufactures and sells test instruments, control systems, laboratory and weighing equipment for a vast range of different purposes and applications, to a great extent under the label 'PCE Instruments', but also from other renowned producers. PCE also provides pre- and aftersales technical advice as well as calibration and re-calibration services.
