Elasto-Kote

Elasto-Kote is a single component, self priming SEBS elastomeric thermoplastic which is applied in two/three coats and comes with a 10 year product guarantee as standard (15 & 20 year guarantees available).

Elasto-Kote is a highly elastic waterproofing system specifically designed for waterproofing pitched metal, coated metal*, concrete and asbestos, EPDM & single ply roofs. It is also suitable for spray foam insulation, single ply and EPDM recoating. Up to 85% solar reflective system with built in rust inhibitors

LRS working with Karnak

LRS are the UK distributors of Karnak Corporation roofing products. Both companies have a long established history of manufacturing and distributing exceptional waterproofing systems.

Applications

Elasto-Kote is resistant to ponding making it suitable for the entire roof structure including drainage. The product can be applied above 5 degrees and normally cures within 4 hours (24 hours for overcoating), typically showerproof in 30 minutes (weather dependant). Elasto-Kote is both fast and simple to apply using a brush, roller or airless sprayer. Also suitable for flat roof applications over single ply and EPDM. For more information contact one of our technical representatives on 01405 780444 or email:sales@meir-roofing.co.uk.
