FastCoat

FASTCOAT is LRS' fast curing, pure polyurethane waterproofing system. FastCoat is a single component brush or roller applied, seamless and fully bonded membrane suitable for application onto both new build and refurbishment projects. With high flexibility and exceptionally tough characteristics FastCoat offers protection for the most demanding and complicated projects.

FastCoat Range

Our FastCoat range offers complete systems for roofing, balconies, gutters, walkways, and many more waterproofing applications. Its fast curing application (typically cured within 4 hours) means that unlike many alternative systems there are substantial reductions in application time, saving significant amounts on project costs and reducing site disruption.

Become an Approved Contractor

Join our network of Approved Contractors by completing our in-house training course, allowing you to use our Pro systems and gain access to our extended product guarantees. To check availability for our courses call our team on 01405 780444 or email: sales@meir-roofing.co.uk.
