

Clustajet Ventilator

SECOMAK

*ATEX Exempt Ventilation And Extraction...
Without Motors Or Electricity*

E: sales@secomak.com

The Beck range of Clustajets are ATEX exempt, maintenance free, motorless and bladeless fans operated by compressed air utilising Ringjet Air Amplifier technology.

Situated within a tough steel casing, multiple ringjets create a "space rocket jet effect" capable of ventilating roughly 25m² per Clustajet, whilst extracting dust, fumes or other hazardous gasses without the use of electricity. This allows the Clustajet to function safely in potentially dangerous environments where traditional fans cannot operate.

Compared to traditional fans, Clustajets are:

- Smaller
- Lighter
- Free of motors and electricity
- Free of moving parts
- ATEX exempt

Longer distances can be covered by placing multiple units in series along a ductwork or flexible hose (sold separately).

Available in anodised aluminium in sizes of 4", 6", 8" and 12".

Clustajets Suitable For

Extraction	Ventilating	Cooling
Welding Fumes	Confined Spaces	Components
Solvent Vapours	Tanks	Pipework
Dust	Sewers	
	Tunnels
