

Windows & Doors

Meridian Building Plastics has now teamed up with a leading British manufacturer of energy efficient and low energy Aluminium and UPVC windows and doors.

With a choice of trade windows and doors from leading systems companies including energy efficient u-PVC windows from Profile 22; PatioMaster trade patio doors; aluminium bifold and inline sliding doors and windows from AluK; and composite entrance doors from Doorco; plus our trade sealed unit supply offer, we've got all bases for trade doors and windows covered.

Smart and Sustainable Solutions

Windows and doors can account for up to 25% of the total energy lost from your home. With this in mind it makes sense to look for replacement options that will not only save you money but reduce carbon emissions and the impact on the environment.

Peace of mind built in

With one home in England and Wales broken in to every 7 seconds – the majority by forcing or kicking a door – your front or back door is at the frontline in the battle to protect your home from intruders. All of our doors can be supplied to the Secured by Design Police Preferred Specification.

- **Multi point locking** – High security steel hooks fully penetrate the door frame keeps, which helps prevent the door sash and frame from being forced apart. A steel deadbolt delivers maximum strength to the centre of the door.
- **High Security Door Cylinder** – Anti-drill, anti-pick and anti-snap kitemarked cylinder lock options available.
- **Reinforcement and Thickening of Door Frames** – This provides a stronger fix and improved hardware retention and screw through-pull, locking the sash and the frame together.
- **Laminated Glass Units** – Internally glazed 6.8mm toughened laminated glass energy efficient units provide increased resistance to attack, if selected. All glazing is supplied as Energy PLUS, incorporating Argon-filled Low E Glass.
- **Robust Hinges** – Supplied as standard, stainless steel hinges provide resistance to resistance testing with 50kg steel impactor. Featuring minimalistic aesthetic design lines.
- **Secured By Design Letterplate** – Designed to meet the exacting requirements of TS008. It's suitable for doorsets that need to be Document Q or PAS 24; 2-16 compliant. Manufactured from 304 Stainless Steel for ultimate corrosion resistance.

Kubu Smart Security

Our range of composite doors works with Kubu as standard. The Kubu sensor monitors the status of your door in real time, alerting you if there's something wrong and providing you peace of mind.
