

Bio X Cleaning Solution

- 20 Litres of bio-remediation cleaning fluid
- Universal use for any make of bio-remediation parts washers
- Ready-to-use, carefully pre-mixed with micro-organisms and cleaning surfactants
- Manufactured under ISO 14001:2015
- No filter mats or micro-organisms tablets required when Bio X is used
- Cleans using natural biological processes.
- Bio X cleaner is a ready to use solution for removing oils, greases, cooling agents etc. From any type of metal / plastic parts
- The special micro-organisms break down oils and fats, ensuring that the cleaning fluid can be used for longer while ensuring a consistently high cleaning performance.
- When used in any dedicated bio parts washers, the Bio X consistently is heated (41°C) and aerated the microorganisms will regenerate and multiply, consistently digesting the waste oil and grease that is washed off the parts after cleaning.
- Special corrosion inhibitors provide temporary corrosion protection after washing.
- Compatible with oil separators
- No labelling required under the CLP Regulations.
- No additional special safety measures required.
- VOC free, no solvents, no toxic fumes, non-flammable
- We do recommend the use of personal protection of gloves and eye goggles when used to protect the user's natural skin oils.
- Dermatologically tested.
- NSF Certified for safe use in the Food Industry, (the surfaces can be rinsed with water to remove any residues)
- Manufactures material safety data sheet supplied with each delivery.
- Fresh apple scent
- Part No 130030

Further information: (Only available in the UK & Ireland)
