

# Website completed for HS-R

We are delighted to share with you our latest project, a WordPress website for Hampshire & Surrey Renewables, a renewable energy company in Farnham.

This is a new company, but a spin off from a construction business established in the area for nearly 30 years. The owner was referred to us by an existing client whose website we created in 2021.

We continue to be an excellent choice for a local business needing a professional and value for money web site presence. We used WordPress templates which means we can provide exceptional value. But as the templates are customisable we can produce a website that also looks bespoke.
