The Benefits of Professional Air Conditioning Installation

By admin

January 10, 2024

No Comments

When it comes to your air conditioning unit, the importance of professional air conditioning installation should never be underestimated. Choosing the right company to install your air conditioning unit is a personal decision based on the type of unit you require, your budget and the standard of results you require. What’s more, the benefits of professional air conditioning installation far outweigh the benefits of DIY air conditioning installation. In this blog, we’ll explore what air conditioning is, the benefits of professional air conditioning installation and how Chillmech can help.

Understanding Air Conditioning

What is air conditioning and what does it do?

Before we look at the many benefits of professional air conditioning installation, let's explore exactly what air conditioning is. Air conditioning units are designed to create and maintain temperatures, reduce humidity and balance air purity within indoor spaces. This process is typically applied to maintain a level of personal comfort, we here in the UK prefer to call it 'Comfort Cooling'.

Whether you're a homeowner or are responsible for an office, leisure centre, retail premises or another commercial environment, you'll likely want to consider air conditioning installation to deliver a healthy and breathable environment, eliminate unpleasant smells and contaminants and provide 'reverse cycle' heat pump heating in addition to cool air.

Our Air Conditioning Installation Services

At Chillmech, we offer full design, installation, servicing, and repair of AC systems, from the smallest to the largest and most complex systems. If you want to transform your home with quality air conditioning, then we have the solutions. With the introduction of 0% VAT for domestic 'Heat Pump' (Air Con) systems, many homeowners have installed AC in their homes, bedrooms, home offices and more. We offer Daikin and Mitsubishi Inverter-driven 'Air to Air' and 'Air to Water' Heat Pump systems which are one of the best energy-efficient heating systems available. Additionally, our clients' lives have been changed by introducing Comfort Cooling to their bedrooms. An advanced system that helps you get a good night's sleep even on the warmest nights.

Our air conditioning installation services include...

- TM44 Surveys (Energy Assessments).
- Emergency call-outs to Air Conditioning faults.
- Repairs to leaking or failed systems.
- Compressor Replacement.
- Condenser coil cleaning and replacement.
- Installation of New Chillers and Heat Recovery Equipment.
- Supply of 'Carrier' 'Daikin' and 'Mitsubishi Electric' spare parts.
- And much more!

Our highly qualified team are here to provide you with fast quotes for air conditioning servicing, installation, and repairs. Please don't hesitate to **get in touch with us** for a **FREE** survey today!

The Benefits of Professional Air Conditioning Installation

Now that you know what air conditioning is and how Chillmech can help, let's look at the benefits of professional air conditioning installation. Whether for domestic or commercial environments, expert air conditioning installation provides a wealth of advantages. Without professional air conditioning installation, you could face future problems with your system, as well as one that doesn't support the energy efficiency of your property. Here are the benefits of professional air conditioning installation.

- **Expertise & Knowledge**

Expertise matters when it comes to air conditioning installation. Layout, room size, air conditioning unit specification and more have a huge impact on the function and efficiency of your AC system. Fortunately, at Chillmech, we have the experience and knowledge required to install an AC unit that perfectly balances your requirements with your property.

- **Energy Efficiency**

[HOME](#)[ABOUT US](#)[SERVICES](#)[BLOGS](#)[CONTACT US](#)[0192 838 669](#)

Choosing the right unit for your space is much more than a stylistic decision. The unit chosen for installation in a commercial environment will be vastly different to the units that domestic clients have installed. We will survey your home or commercial space thoroughly to determine which type of air conditioning unit will be right for you.

- **Extended Lifespan**

Air conditioning is built to be long-lasting, as long as it is installed, serviced and maintained by professionals. Expert installation ensures that your air conditioning system is connected and calibrated correctly, therefore reducing the risk of breakdowns and issues from arising further down the line.

- **Compliance**

Did you know that building regulations can dictate specific requirements for air conditioning installation, particularly in commercial environments? With professional AC installers such as Chillmech working on your unit installation, you can rest assured that your air conditioning system will be fully compliant with building codes.

- **Maintain Your Warranty**

Your air conditioning unit will likely come with a manufacturer's warranty, and professional installation is often a warranty requirement. Ensure that your system is protected in the long-run and preserve your warranty coverage by choosing professional air conditioning installation.

- **Speedy Installation**

We at Chillmech are industry professionals in air conditioning installation. Our years of experience, combined with our highly skilled team means that we can quickly and effi

installation, maintenance, repair and replacement of all types of air conditioning and Heat Pump systems. So, once installation is complete, you can call on us for air conditioning servicing, maintenance, repairs and more.

The benefits of coming to a professional company for air conditioning installation speak for themselves. Ensure the function, safety and energy efficiency of your air conditioning system by calling on air conditioning professionals today. So, if you're ready to book your air conditioning installation, please don't hesitate to **get in touch with us today** for a **FREE** survey and quote!

In Conclusion...

When you're planning on installing a new air conditioning system, calling upon professionals has to be the right choice to make. The benefits of professional air conditioning installation are clear to see. Professional installation guarantees that your AC system will perform optimally, will have a long life span, will remain energy efficient and, ultimately, will be the right air conditioner for your home or business. We highly recommend contacting experienced air conditioning specialists for air conditioning installation, servicing, maintenance and more.

We at Chillmech are one of the oldest established air conditioning companies in the UK, continuously trading since 1976. We specialise in the installation, maintenance, repair and replacement of all types of air conditioning and Heat Pump systems. We have built a sound reputation for providing excellent client service and communication skills, with many of our customers retaining our services for over 20 years. Our Top Tips For Looking After Your AC System...

Here at Chillmech, we have seen our air conditioning units last for up to 20 years. There are several things that you can do to ensure that your air conditioning system lasts for as long as possible once it has been installed by experts. Here are our top tips for looking after your air conditioning system ...

- Annual servicing – **speak to us** about our AC servicing.
- Check refrigerant levels.
- Test for issues such as refrigerate leaks and the condition of seals.
- Measure airflow through the evaporator coil
- Inspect, clean and tighten connections.
- Inspect the system for general wear and tear.
- Check the accuracy of the thermostat.
- Listen out for any unusual noises.

For more information or trusted advice, please don't hesitate to **get in touch with Chillmech today** – we're happy to help in any way we can.

Air Conditioning FAQs

Q: How much does an air conditioning installation cost?

The cost of air conditioning installation will vary depending on your requirements. **Get**
