Do you want to keep your home cool during the summer? Would Comfort Cooling in your bedroom help you get a good night's sleep? Or perhaps your commercial space could benefit from functioning air conditioning? Whether you already have an air conditioning unit or are planning on having one installed, servicing your air conditioning unit should never be overlooked. Servicing your air conditioning unit is key to maintaining comfortable temperatures all year round, whether you are in a domestic or commercial environment. Here, we'll explore w

50 years we have specialised in the installation, maintenance, repair and replacement of all types of air conditioning and Heat Pump systems. This makes us the leading choice for AC servicing and more!

*Let us keep you cooler for longer with an annual air conditioning unit service and **get in touch with us today** for your **FREE** survey – we can't wait to hear from you!*

Understanding Air Conditioning

What does air conditioning do?

Before we delve into why servicing your system is so important, let's explore exactly what air conditioning is. Air conditioning is the process used to create and maintain a certain temperature, relative humidity and air purity conditions within indoor spaces. This process is typically applied to maintain a level of personal comfort, we here in the UK prefer to call it 'Comfort Cooling'.

So if you desire more comfortable temperatures at home, or are responsible for an office, leisure centre, retail premises or another commercial environment, you'll likely want to consider 'Comfort Cooling' for your home or business.

In addition to high-performance cooling capabilities, air conditioning units can:

- Deliver a healthy and breathable indoor environment.
- Eliminate unwanted smells and contaminants.
- Provide 'Reverse Cycle' Heat Pump heating in addition to cool air.

For your AC system to work properly and to ensure its lifespan, an annual air conditioning service is recommended. Please don't hesitate to **get in touch with us** for a **FREE** survey and quote today!

Our Air Conditioning Unit Services

offices and more. We offer Daikin and Mitsubishi Inverter-driven 'Air to Air' and 'Air to Water' Heat Pump systems which are one of the best energy-efficient heating systems available. - And much more!

Our highly qualified team are here to provide you with fast quotes for AC servicing, installation and repairs. Please don't hesitate to **get in touch with us** for a **FREE** survey today!

Why It's Important To Service Your Air Conditioning Unit

Now that you know what air conditioning is, its applications and how Chillmech can help, why is it so important to service your air conditioning unit? Here are some of the many advantages that AC system servicing can deliver to your home or commercial space...

- **Extended Lifespan**

Air conditioning is built to be long-lasting, as long as required maintenance, such as servicing, is undertaken. Regular servicing can extend the life of your AC system, protecting your investment in the long term.

- **Prevents Breakdowns**

Our engineers will complete thorough inspections and tests on your air conditioning unit. These tests will identify any potential issues before they become major – and more expensive, problems in the future.

- **Cooling AND Heating!**

Did you know that fully functioning air conditioning systems can heat rooms as well as cool them? By simply reversing the operation of the Refrigeration system you can keep your home cool in the summer and warmer throughout the winter too.

- **Better Air Quality**

When it has been serviced and is fully functioning, your AC system is great at improving air quality. By filtering out 'dirty' air your air conditioning system works hard to replace it with clean, fresh air. This means that you'll be cooler and able to breathe more easily.

- **Reduces Health Issues**

When functioning air conditioning provides better quality air, it can lower the risk of triggering health problems such as asthma. With toxins, dust and debris removed from your property, this is a great benefit for those with health problems and allergy sufferers alike.

- **Increased Productivity**

- **Environmental Benefits**

When air conditioning is functioning as it should, it can contribute to lower energy consumption. This lower energy consumption will reduce your carbon footprint – a great benefit to the environment.

- **Consistent Comfortable Temperatures**

Servicing your air conditioning unit ensures that you enjoy consistently comfortable temperatures in your home or commercial space. See inconsistent cooling and heating become things of the past with regular AC servicing.

- **Maintain Your Warranty**

Your air conditioning unit likely comes with a warranty, and servicing it is often a warranty requirement. Ensure that you preserve your warranty coverage and protect your investment with AC system servicing.

- **Peace of Mind**

Regularly servicing your air conditioning unit provides you with peace of mind that your system is functioning as it should. What's more, you can enjoy hassle-free cooling and heating throughout the year.

If you're ready to book your air conditioning service, **contact us today** for a **FREE** survey and quote!

How do you service an air conditioning unit?

We have seen air conditioning last for up to 20 years. However, to achieve this, we recommend an annual air conditioning service. Our air conditioning service includes:

- And more!

When you choose Chillmech to service your air conditioning unit, you will enjoy an end-to-end service for your complete peace of mind. **Get in touch with us** to book your **FREE** site survey today.

How do I know if my air conditioning unit needs servicing?

If you're not sure if your air conditioning system needs servicing, here are some warning signs to look out for...

- Low refrigerant.
- Frozen evaporator coils.
- Dirty condenser coils.
- Fan problems.
- Leaking ducts.
- Thermostat problems.
- Clogged drains.

If you've noticed that your air conditioning unit is exhibiting any of the above, please don't hesitate to **get in touch with us** today.

Our Top Tips For Looking After Your AC System...

We have seen our air conditioning units last for up to 20 years. Here are our top tips for looking after your air conditioning system ...

- Annual servicing – **speak to us** about our AC servicing.
- Check refrigerant levels.

Air Conditioning FAQs

Q: How much does an air conditioning service cost?

The cost of an air conditioning service will vary. **Get in touch with us** for a **FREE** quote!

Q: How often should air conditioning be serviced?

We recommend servicing your AC unit at least once a year to ensure it's performing at its best.

Q: Can I service my AC unit myself?

We recommend contacting professionals to service your air conditioning unit.

Q: What is the lifespan of an air conditioning unit?

With proper maintenance and annual servicing, we have seen our AC units last for over 20 years.

Q: Is annual air conditioning unit servicing a requirement for warranty coverage?

We recommend checking your warranty terms, as many manufacturers require annual servicing to maintain coverage.
