

ELECTRIC MOTORS & VENTILATION FANS

Everel Motors and Ventilation Fans

Everel electric motors are highly efficient and reliable, used in applications that require low consumption and high performance. These include thermal convectors, humidifiers, kitchen hoods, air extraction units, ovens and dishwashers. Everel's brushless motors offer approximately 70% energy saving compared to standard motors.

Everel's ventilation fans are quiet, reliable and available in a range of versions to integrate and fit with a wide range of appliances. Designed to suit individual customer applications, these ventilation fans are typically supplied with an integrated motor. So, if you require a solution where forced air cooling is required, discover our ventilation systems.
