# CAMS

Polgain Limited manufactures cams from a wide variety of materials to suit most heat treatment requirements, working from customer's drawings or supplied samples.

Castings, forgings, steel bar and heat treatment services can all be knowledgeably sourced from our expert engineering office.

Able to grind plate cam profiles up to 1300mmØ and barrel cams to 900mmØ. Typical product types include, plate cams, barrel cams, face cams, winding cams, swing arm cams and conjugate cams. These parts can be milled or ground to suit customer's requirements

A sample of the business sectors supported is Bottling, Canning, Packaging, Pharmaceuticals, Tissue Converting, Marine and Power Generation.

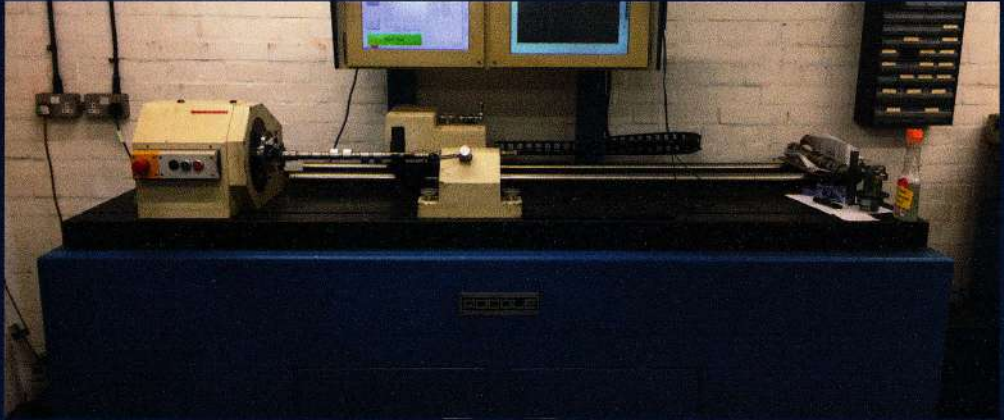

## CONTACT NOW TO LEARN

# CAMSHAFTS & PRECISION ENGINEERING

CNC Landis camshaft grinding and CNC Adcole Cam Contour measuring machines make Polgain a very capable manufacturer of camshafts up to a length of 1800mm. polygons, eccentrics, flats and many other forms can also be generated.

A sample of the business sectors supported is motorsport, prestige, classic, power generation, automotive development, automotive tooling (Gangmasters) and matrix dresser cams.
