

Qonnect Launch Two New Battery Tools To Improve Your Riveting Performance – Available Now at Zygology

As the proud UK distribution partner for Qonnect and as part of our ongoing commitment to delivering the best in fastening technology to our customers, we're delighted to announce the arrival of the latest battery-powered rivet tools from Qonnect, the [QN12XL](#) and the [QR64XL](#).

Known throughout Europe for their service quality, speed, and reliability, Qonnect is a partnership between various European and Asian-owned manufacturers of blind rivets, blind rivet nuts, and associated riveting tools. Quick to respond to market trends and developments and you can get Qonnect's latest rivet tool offerings at Zygology.

Qonnect QN12XL Battery Powered Rivet Nut Tool

Easy To Use With Class-Leading Features

The QN12XL is a powerful, easy to use new battery-powered rivet nut tool with class-leading features. Capable of installing rivet nuts from M3 to M12 in aluminium, steel and stainless steel, the QN12XL features push-button controls and a digital screen, plus a class-leading automatic triggerless setting feature.

This new tool uses push-button controls and a digital screen to set the stroke length, helping to make switching from one application to another quick and precise. In order to enhance quality control, the tool can also record the number of inserts set.

Featuring a brushless DC motor and optimised gearbox, the QN12XL ensures fast cycle times and is ideal for quiet environments.

The innovative automatic setting option eliminates the need to use the trigger to install inserts: operators simply push the tool onto the insert, it then winds on, installs, and winds off fully automatically. This facility completely eliminates operator error from the process and allows workers with no previous experience to use the tool at maximum efficiency levels.

- M3 – M12 capability in all materials
- Setting force 25kN
- Brushless DC motor
- Quick-release mandrel system

- Digital stroke setting with display
- Installs up to 1,200 M6 steel rivet nuts on a single charge
- Digital setting counter
- Reverse wind off button in case of cross-threading or jams
- Soft feel grip and light pull trigger
- Fully automatic placing function
- Total weight 2.1Kg including supplied 20 volt 2.0AH battery
- Lock function to prevent accidental settings changes

Qonnect QR64XL Battery Rivet Tool

Will Meet All Your Riveting Requirements

The other new addition to the range is the QR64XL, a well-designed and powerful battery-powered rivet tool. Capable of installing rivets from 2.4 to 6.4mm diameter including structural rivets such as Monobolts or M-Power structural rivets, this versatile riveter will meet all your riveting requirements.

Light and well balanced the extended rivet setting range of the QR64XL combines the capability of two conventional rivet tools into one unit.

- Capable of installing rivets from 2.4 to 6.4mm diameter
- 20 Volt brushless motor generates 20,000 Newtons of traction power
- 27.0mm stroke length cope with even the longest rivets
- Well balanced, soft feel grip and a light short pull trigger to maximise operator comfort
- Quick-release and transparent stem collector for convenience
- Built-in LED light to illuminate the workspace

Strength, Technology, Quality, and Innovative Design

Qonnect describes their tool range as, “Focussed on strength, technology, quality, and innovative design, as demonstrated by our most recent line of Q-TOOLS.”

Specifically focusing on the QN12XL, Qonnect announced, “A high-quality and professional tool that meets 21st-century expectations. With a high capacity,

user-friendly digital settings, maintenance-free motor and a price that matches the quality of the tool.”

Discussing the new tools from Qonnect, Zygology Sales Director, Richard Avery said, “Qonnect tools have been specially designed for trouble-free installation of any type of blind rivet or nut.

“They have already proven to be a popular choice with our customers and a fast-seller that we’re proud to stock and distribute.”
