

New Southco M5 Magnetic Catches Combine Strength and Style - Available Now at Zygology

Delivering the holding power of rare earth magnets, Southco have launched the M5 Magnetic Catch. Combining strength and style, the latest in Southco's magnetic catches range provides a secure, robust, and attractive solution for keeping doors and panels open or closed.

A reliable alternative to door stays, the M5 features corrosion-resistant stainless steel and has a highly polished finish, so it looks great no matter the application.

Strength and Versatility

Offering simple push-to-close and pull-to-open functionality, it's well suited to high vibration environments. Additionally, it can be configured to provide nominal holding powers from 50-118 N (11-26 lbs) to accommodate multiple door sizes and weights with a significant tolerance for misalignment.

M5 Magnetic Catches are available in a range of swivel catch height options that can be mounted horizontally or vertically, and fixed catch options that mount flush to or directly on the surface to suit a wide range of door, panel and window dimensions.

Swivel catches are easily adjusted to hold at any desired angle. They include a rubber bumper surface to minimise noise from closing and vibration whilst also preventing scratching the mating fixed catch.

Southco M5 Magnetic Catches' Features and Benefits:

- Rare earth magnets provide superior holding power
- Corrosion-resistant marine-grade stainless steel construction
- Alignment flexibility and adjustable to any angle
- Anti-vibration
- Suitable for a wide variety of door sizes and weights
- High gloss finish offers enhanced industrial design
- High tolerance for misalignment
- Magnet shrouded in stainless steel or Nylon to withstand the marine environment

Applications Include:

- Marine equipment
- Recreational vehicles
- Rail
- Automotive

Enhanced End-User Experience with Simplified Installation

Announcing the new M5 catch, Southco Global Product Manager Cindy Bart, "Styled to complement applications including RV, rail, bus and marine equipment, Southco's M5 Magnetic Catches provide the strength necessary to keep doors and panels in place with a range of configurations for flexible mounting and alignment. With its highly polished, stainless steel construction, the M5 offers exceptional corrosion resistance for challenging environments."

Zygology Sales Director, Richard Avery added, "Combining rare earth magnetic strength, corrosion resistance and an attractive aesthetic, M5 catches are sure to be a versatile and popular solution for our customers.

"It's a welcome addition to our Southco range of catches."
